ANNABAA
TRADING FZCO

COMPANY PROFILE

Company Overview

Introduction

Annabaa Company is one of Almoosawi group companies, it was established in 2003, we have a well-known reputation for quality of our services in providing professional IT solutions to the diverse corporations and organizations across Iraq. Our senior consultancy engineers have extensive technical management experience as a leading provider of IT services in the southern region of Iraq, Our priority is to ensure we remain a unified company working throughout the region where we are active.

Our aim to continue to be the preferred partner and supplier of IT services and solutions that innovates progressively and thereby contributes to the satisfaction and trust of our customers. Our company was developed with its own resources and knowledge and contributes in development and competition in IT sector in the south region of Iraq with very high quality and low prices, and this makes us a technology leader IT Solutions Company.

Vision

Always the leader in providing and implementation of IT and Telecommunications products and services in a professional manner through trust, precision and commitment to our customers and partners.

Mission

To ensure wide spectrum of quality services with low prices for individual and business clients, and ensure support to those services with newest solutions of technology.

Values

Integrity and Professionalism

We strongly endeavor to be an organization where professional integrity and fair play flourish through trying to match our obligations with the maximum responsibility and professionalism; our customers can always rely on receiving above-average and technically Superior services that are easily available, which ensure complete security and a guarantee of long-term reliability. We also take care to ensure the Comprehensiveness of the portfolio of services we offer and their easy integration into existing systems.

Pursuit of Excellence

We strive to safeguard our shareholders, suppliers, customers and strive to exceed the expectations of our shareholders.

Innovative solutions

In further developing our services, we continue to look for new options in terms of Innovations and improvements to our current systems and products. We place great emphasis on technological perfection and evaluate our work with the best experts. To succeed in a competitive environment means monitoring new trends in the market, and for us this is more than a challenge to go forward, it is also our inspiration behind driving telecommunications to a higher level.

Teamwork

We strongly reward initiative and innovation, and lay greater emphasis on team performance.

Partnership and Customer satisfaction

Satisfaction and long-term good relations with customers built on mutual trust together form our highest priority. Our partners are regularly updated concerning special offers or new products in our portfolio, and we also offer our clients custom-made solutions that meet all their requirements in terms of the technical aspects and contract duration. When developing new services, our actions are always governed by our customers' needs.

Team of experts

Professional employees form the basis of our know-how, and we believe in choosing the best and assisting them in continuing to develop their potential and qualifications a good working environment, the right motivation and great teamwork is the way we use to a successfully achieve our aims, our vision and our values.

Our Services

Network Services

Our network services provide assessments to evaluate the current condition of a designed or implemented network via documentation reviews or onsite network analysis. An assessment can help to prevent or fix network issues by evaluating the network, documenting design or implementation issues and offering resolutions, as well as provide information about potential problems that could result in future unplanned downtime. Assessments can help you determine if the network is able to meet the functional requirements you need to achieve your goals.

Design Assessment

Network design reviews your existing design documentation (network layout, Bill of Material (BOM), cable schedules, configuration plans) to ensure the specified components, network architecture and network configuration scheme will meet your functional requirements. Your deliverable is a summary that can be used to ensure all vendor designs will interconnect without any issues, to verify the design is within your specific requirements or to offer third-party review.

Onsite General Assessments

This is a one day review of the network's installation, configuration and information. You will receive a summary of findings with a rated criticality and high level path forward.

Onsite Comprehensive Assessment

This assessment focuses on your need (issue, upgrade or expansion), and can include operational tests, physical media testing or specific issue identification. Your deliverable is a summary that will assist you in preventing downtime by bringing your network up to optimal condition.

Annabaa provides consultation services that ensure the customers' ultimate needs are met or exceeded. This also allows us to maintain a strong relationship with the customer from the project's planning stages to the installation phase and forward by performing regular maintenance, engineering, and installation services on an as-needed basis. Annabaa can ensure you meet your customers' needs by engineering the appropriate solution for your Fiber, Coaxial, Cat 5, Cat 6, Cat6A, and telecommunications wiring and installation whether the customer is residential or commercial.

Annabaa can perform all your construction needs and provide CAD drawings for the placement of fiber, twisted pair, and CATV cabling for underground conduits or direct buried applications. Look to Annabaa when you need to move your existing service, add on to your service or change your service; we are here to help provide you with management solutions that are going to provide the best possible service that is custom-made to your business. In addition, we are available for emergency technical support service 24 hours a day, 7 days a week

**In addition, we are available
for emergency technical
support service
24 hours a day, 7 days a week**

Some of the services we provide include:

- Building-to-Building Cabling.
- Fiber Cable Installation.
- Coaxial Cable Installation.
- Service for Connectors and Splicing.
- Riser Test Documentation and Backbone Services.
- Many other fiber optics installation services.

Fiber Optics Services

Over the years it has become evident that fiber optics are steadily replacing copper wire as the means of communication signal transmission. They span over long distances between local phone systems and they provide the backbone for many network systems. Fiber optics utilizes light pulses to transmit information down fiber lines instead of using electronic pulses to transmit information down copper lines. Annabaa specializes in fiber optic cable installation and fiber optic services. We have a knowledgeable team of expert fiber optic installers that can take care of any services you may need.

IPTV SERVICES

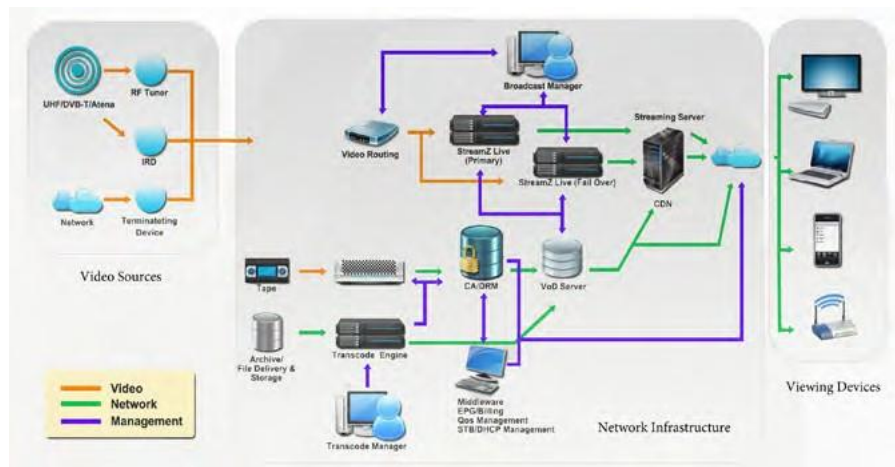

Internet Protocol television

IPTV is one of the systems that offers its services through the ways of internet and television services by using an architecture and networking methods of the internet protocol suite over a packet-switched network infrastructure through internet and broadband internet access networks instead of being delivered through satellite signal, traditional radio frequency broadcast and cable television (CATV) formats.

IPTV is popularly known by a kind of multimedia services such as television/graphics/text / audio / video / data delivered over IP based networks and protocols that are managed to provide the required level of quality services along with the world class experience, interactivity, security and reliability. Live TV, Interactive TV and Video on Demand are some of the famous examples of IPTV.

In this modern and technology world, IPTV services may be classified into three main groups: time-shifted programming, live television and video on demand. With the implement of latest technology of on-going standardization process, subscriber-based telecommunications networks with high-speed access channels and preferential deployment scenarios via set-top boxes make IPTV distinguished from other Internet-based or web-based multimedia services.

Annabaa specializes in IPTV installation and IPTV services. We have a knowledgeable team of expert IPTV installers that can take care of any services you may need

CCTV

Theft, shrink, accidents, productivity & fraud pose enormous threats to business owners. Aside from the obvious financial strain they have on revenue, identifying and correcting these issues can become time consuming and frustrating. Annabaa helps businesses to take a proactive approach to profit killers with a winning combination of carefully planned video surveillance monitoring and a comprehensive Loss Prevention Program. Our technicians have years of experience in the surveillance industry and have helped business owners identify problem areas and stop losses associated with theft, productivity and safety.

Our Services

- CCTV Planning
- Remote Video Surveillance.
- Security Cameras.
- Security Systems.
- Remote Office Monitoring.
- Loss Prevention Application.
- Software Solutions for ERP and production Activities.
- Stand Alone Security DVR Solutions.

With a company philosophy of providing a large range at competitive prices, we should be your one and only port of call, when it comes to installing security devices in your property. We specialize in providing the perfect security solution for business and domestic premises alike and we're confident, as a company, that you'll find everything you're ever likely to need, when it comes to securing your premises. If you're not particularly well versed with the virtues of individual pieces of equipment our digital CCTV camera kit provides the obvious solution. Regardless of whether you opt for the basic product, or something with enhanced capabilities, you'll be more than impressed with the features they offer.

Whether you are in need of video surveillance equipment or looking to upgrade, repair or improve your existing system, Annabaa can help you implement the optimal system for your business needs and put an end to profit killers altogether.

Experiences

1. Providing and installing Local Network with Dedicated VSAT System for Shell Gas and Power Development in their main office in COB Basrah (2010).
2. Providing and installing Satellite TV network and satellite switch receiver for Shell Gas Power Development in their main accommodation area (2010).
3. Designing, providing and implementation of network infrastructure of more than 1000 points including more than 200 Fiber Optic points for Halliburton Camp in Basra (2010/2011).
4. Designing, Providing and implementation of Local Network Components with UTP cable termination and fiber optic network for CCTV system for RGS/ Halliburton Camp in Basrah (2010/2011).
5. Designing, Providing and implementation of Local Network Components with UTP cable termination and fiber optic network for CCTV system including Ops Room Installation for RGS/Baker Hughes Camp in North Romela (2011).
6. Providing and installing Local Network points including Fiber Optic network for Schlumberger Camp in Basra (North Romela) 2011.
7. Installing VSAT system for 4 Power Client (G4S) in Basrah (2011).
8. Continue providing maintenance for 4 Power Client (FCO) in COB Basra camp in Basra (2011).
9. Designing, Providing and implementation of network infrastructure of more than 300 points including Fiber Optic network for Halliburton Camp in Majnoon/ Basra (2011).
10. Designing, Providing and implementation of network infrastructure of more than 400 points including Fiber Optic network for Schlumberger Camp (Workshop and Accommodation) in North Romela/ Basra (2012).
11. Designing, Providing and implementation of network infrastructure of about 240 points including Fiber Optic network for Halliburton Camp (expansion for Accommodation) in Burjesya/ Basra (2012).
12. Supply chain for computers, printers and their accessories for Halliburton (2010 till now).
13. Supply chain for computers, printers and their accessories for Schlumberger (2010 till now).
14. Supply chain for computers, printers and their accessories for Baker Hughes (2012 till now).
15. Supply chain for computers, printers and their accessories for ROO (2012).
16. 2 years agreement to provide HP Printers Supplies for ROO (2013).
17. 3 years agreement to provide HP Printers Supplies for Halliburton (2013).
18. 3 year FSMA Services for Halliburton main camp in Burjesya (2015).
19. Designing, providing and implementation of CCTV Network for NAWAH/ AlMaaql Port (2013/2014).
20. Designing, providing and implementation of wifi system for NAWAH at AlMaaql Port and Alzubair Warehouse (2013).
21. Supply chain for computers, printers and their accessories for Weatherford (2013 till now).
22. Designing, providing and implementation of network infrastructure including fiber optic network for Halliburton (Boots & Coots) Camp in Perpitan/ Erbil (2013/2014).
23. Designing, providing and implementation of network infrastructure for Halliburton (Boots & Coots) Camp in Dream City/ Erbil (2014).
24. Design, supplying and implementation of network infrastructure of Halliburton PA system / Basra camp (2021).
25. Supplying GCME and Cloud based SAAS hosting for PetroChina (2023-2026)

Water Treatment Equipment Trade and Environment Protection Equipment Trade

Annabaa is a leading provider of water treatment solutions and Environmental Protection Equipment's with over 10 years of experience in the industry. We offer all types of Water Treatment Solutions: from complete Reverse Osmosis (RO) Systems, High-Pressure Pumps, and Pressure Vessels to water treatment-related components.

We are your one-stop source for freshwater. If you notice a problem with your water, our water experts are ready to help you solve it. We provide a full selection of Water Filtration Systems, including reverse osmosis systems, UV water purifiers, water softeners, whole house water filters, and much more.

We are dedicated to bringing the most valuable solutions and providing the best customer experience, in meeting water and environmental needs through our products and services.

Specialties

Water Treatment, Nanofiltration Membranes, Antiscalants and Membrane Cleaning Chemicals, Reverse Osmosis Membranes, High Pressure Pumps, Ultrafiltration and Microfiltration Membranes.

Our main products include filter, filter element, filtering equipment, hydraulic equipment, dust removal equipment, air purification equipment, desalination equipment, sewage treatment equipment, solid waste sorting equipment and oil purification equipment.

We trade and sells environmental protection equipment. We are a supplier of flue gas purification and treatment solution integrating environmental engineering system design, bag filter and sales service in the field of air pollution control.

our company's products include Bag Filter; Bag and Electrical filter; Cyclone and Furnace shell
